<sup>1</sup> Beginning in 2003, respondents were able to identify themselves as being “more than one race.” The White, non-Hispanic; Black, non-Hispanic; and Asian/Pacific Islander categories consist of individuals who considered themselves to be one race and who did not identify as Hispanic. Non-Hispanics who identified as multiracial are included in the “more than one race” category. The Hispanic category consists of Hispanics of all races and racial combinations. Due to small sample size, American Indians/Alaska Natives are included in the total but are not shown separately.

<sup>2</sup> Individuals defined as “first generation” were born in the 50 states or the District of Columbia, and one or both of their parents were born outside the 50 states or the District of Columbia. Individuals defined as “second generation or higher” were born in the 50 states or the District of Columbia, as were both of their parents.

NOTE: Status completion rates measure the percentage of 18- through 24-year-olds who are not enrolled in high school and who also hold a high school diploma or equivalent credential such as a General Educational Development (GED) certificate. Those still enrolled in high school are excluded from the analysis. Detail may not sum to totals because of rounding.
