

Hear the beat

Observations

You can make sounds when you beat, shake, or scrape things. You can make sounds when you pluck strings or use a bow. Blowing through a hole can also make a sound.

Science activity

Draw a circle around each instrument that makes a sound when you beat it.

Science explanation

Blow over the neck of a bottle. What happens? Pour a small amount of water in the bottle and blow again. Add more water and repeat. How does the sound change? Explain.
