ORDER OF OPERATIONS
WITH FRACTIONS

Simplify each expression using the correct order of operations.

- $\dfrac{5}{8} \times \dfrac{2}{3}$

- $\dfrac{9x}{8} - \dfrac{x-5}{16}$

- $\dfrac{2}{7} : \dfrac{3}{5}$

- $\dfrac{4x}{7} - \dfrac{x-3}{8}$

- $\dfrac{9x}{8} - \dfrac{x-5}{7}$

- $\dfrac{8}{12} + \dfrac{9}{15}$

- $\dfrac{2x}{11} - \dfrac{5(x-2)}{11}$

- $\dfrac{12}{5} + \dfrac{4}{6}$
