# Characteristics Of Metals In Chemical Properties

Directions : Fill in the blanks with the characteristic of metals  
in chemical properties.

1. Metals lose electrons during chemical reactions, forming positive ions is a response or .....
2. .... metals are generally basic and react with acids to form salts and water.
3. Metals will produce hydrogen gas and salt if .....with.....
4. Metals rust easily when exposed to water and oxygen.  
These are the characteristics of metals that are.....

## Chemical Properties Of Metals

- Reactivity
- Oxides
- Reaction
- Acids
- Corrosion
