

Name: _____

Date: _____

Characteristics Of Metals In Physical Properties

Directions : Match using the line between physical properties and appropriate statement about the metal.

Metals can be drawn into wires

Good conductors of heat and electricity

Metals generally have high density

Have high melting and boiling points

Metals have a shiny appearance

Solid at room temperature

Can be hammered or rolled into thin sheets

Luster

Malleability

Ductility

Conductivity

Density

Melting Points

State at room temperature
