## Word Matching

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Draw a line between the word and its definition!

flagella
nucleus
cell membrane
cytoskeleton
mitochondrion
cell wall
cytoplasm
vacuole
chloroplast
cilia
ribosomes
nuclear membrane

Outer surface layer/ made of cellulose
This synthesizes proteins
Functions of cell parts that control support
Peanut-shaped/ breaks down sugar
Large, oval; holds DNA
Few in numbers, but is long
green, oval containing chlorophyll
This surrounds the nucleus/ double membrane
Clear, thick, and jellylike material (cytosol)
Fluid-filled sacs
This strengthens cells and maintains the shape
Numerous, but short
