

Respiratory System

Name: _____

Date: _____

Draw a line between the statements about the respiratory system and its correct word!

Our throat
Smallest sub-divisions of the bronchial tree
Cessation of breathing
What we call the windpipe
Abnormally high levels of carbon dioxide
The serous membrane that lines the chest cavity and lungs
Stretch receptors that send signals to the medulla to exhale
Lower surface tension, prevent friction
Space between the lungs
What we call the voice box
Protective flap over the trachea
When the cells are not receiving enough oxygen
Grape-like in shape, the functioning part of the lungs
Rapid, Fast Breathing
The lungs are in this sac
Their function is to transport air into the blood and remove gases

Pleural Sac
Surfactant
Lungs
Larynx
Trachea
Pleura
Mediastinum
Tachypnea
Alveoli
Apnea
Bronchioles
Epiglottis
Hypercapnia
Hering Breuer Reflex
Hypoxia
Pharynx
