The Scientific Method

1. Identify the Problem

What is the problem or question you want to investigate?

2. State Your Hypothesis

What do you think will happen in your experiment?

3. Describe Your Experiment or Research

Explain how you will test your hypothesis or research your question.

4. Data Collection

How and what kind of data will you collect?

5. Data Organization

How will you organize and present your data?

6. Conclusion

What do you expect to learn from your experiment?
If your hypothesis is incorrect, explain why.
