The Mysterious Island

Read the text below and answer the questions by choosing the true option.

Last summer, Mia and her family went on a boat trip along the coast. One sunny morning, as the boat gently rocked on the waves, Mia noticed a small island in the distance. It was unlike anything she had ever seen its shores were covered with lush green trees, and a thin column of smoke curled into the sky.

Curious, Mia convinced her parents to steer the boat closer. As they approached, the island grew larger, revealing a sandy beach dotted with colorful shells. "This must be an uncharted island!" Mia exclaimed excitedly.

When they landed, the family discovered a small wooden cabin hidden among the trees. Inside, they found old fishing gear, maps, and a journal with faded writing. The journal told the story of a sailor named Captain Reed who had been stranded on the island years ago. He wrote about surviving storms, fishing for food, and hoping to one day be rescued.

Mia's family spent the rest of the day exploring the island. They saw exotic birds, hidden caves, and a freshwater spring bubbling from the rocks. By evening, they returned to their boat, promising to come back and learn more about the mysterious island.
