Geography Contour Mapping

This map shows an area with hills and a depression.
Unlike many actual topographic maps,
the elevations are in meters and the distances are in in kilometers.
Answer the questions that follow the map.

Elevations are in meters

1 cm = 1 km

1. How many hills are on this map?

2. How many depressions are on this map?

3. What is the contour interval?

4. what is the height of the highest hill?
