

Name :

Date :

My name is George. I am a grasshopper. I have six legs and five eyes. I do not have ears or a nose. I have holes along my body which is how I breathe. I like to eat leaves and grass.

The farmers do not like me because I eat their crops. I can hop, walk and fly around. I can sing by rubbing my legs and wings together. I live in fields and meadows, I can jump very high, I hide from lizards and birds. They like to eat grasshoppers. It is very hard to catch me. I can see forwards, backwards and sideways.

Answer the questions below.
