# MAIN IDEA

Write the main idea of each story.

- ① The Sun is a star in our solar system. While there are millions of stars in the sky, the Sun is the one that is closest to the Earth. The Sun gives light and heat to us, and we need it to have life! The Sun, like other stars, is made of a huge ball of burning gases.

- ② Some kinds of bats eat many insects. Some bats can eat up to 600 mosquitos in one hour. Bats are helpful to the environment. They help us by eating insects. Without bats, we would have too many insects.

- ③ Dogs make good pets. They are very loyal animals. Dogs love to be around humans as much as humans love to be around dogs. They will sit with you and keep you company. Dogs are also fun to play with. They love to play fetch and go on walks. No wonder dogs are called 'man's best friend'.
