## Bees and Their Jobs

Bees are important insects that help plants grow. They fly from flower to flower, collecting nectar and spreading pollen.

This process is called pollination. Bees live in hives and work together as a team. Worker bees collect food, while the queen bee lays eggs.

Question!

1. What is pollination?

-----

2. What do worker bees do?

-----

3. What do queen bee do?

-----

4. Why are bees important?

-----

5. Define "nectar" !

-----
