PLANTING A SEED

Mia got her gardening tools. She took a small pot, some soil, a seed, and a watering can. Mia filled the pot with soil. She made sure there was enough soil to cover the seed. Then, Mia made a small hole in the soil with her finger. She carefully placed the seed in the hole and covered it with soil. Mia took her watering can and gently poured water over the soil. She made sure the soil was nice and moist. Mia put the pot in a sunny spot. Every day, she checked the soil and watered it when it was dry. Finally, after a few days, a small green sprout appeared. Mia was so excited to see her plant growing!

Mia made a small hole in the soil and carefully placed the seed in the hole.

Mia put the pot in a sunny spot, the soil and watered it when it was dry.

Mia took a small pot, some soil, a seed, and a watering can.

A small green sprout appeared.

Mia filled the pot with soil.

Mia poured water over the soil.
