## A JOURNEY TO SPACE

**Directions:** Read the passage carefully, choose the correct answer to the questions, write your answers in the space provided using a pencil, and feel free to reread the passage if you're unsure.

One evening, Jake and his sister Emma were looking up at the stars. They loved to imagine what it would be like to travel to space. "Wouldn't it be amazing to see the planets up close?" said Jake. Emma nodded. "I wish we could go on a spaceship," she said.

The next day, their parents took them to a science museum. There, they saw a real model of a spaceship. It looked big and shiny, and Jake was excited to learn more about space. The guide at the museum told them that astronauts travel in special spacecraft to explore outer space and visit planets like Mars and Jupiter.

Jake and Emma watched a movie about space exploration, where they saw astronauts floating in zero gravity and walking on the moon. After the movie, they went to the space exhibit, where they could touch a model of a moon rock and look through a telescope to see distant stars and planets.

Before leaving, Emma made a wish. "I hope one day we can travel to space and see all the planets for ourselves!" she said.

### Questions

1. What did Jake and Emma look at in the evening?

---

2. Where did Jake and Emma go the next day?

---

3. What did they see at the science museum?

---

4. What did Jake and Emma do at the space exhibit?

---

5. What did Emma wish for before leaving the museum?

---
