Julia was a very \_\_\_\_\_ organized student. She kept all her school work in a folder

with dividers with no titles. The \_\_\_\_\_ titled folders did not serve much.

They were use \_\_\_\_\_. She asked her mom for help to put everything in order,

but she had to \_\_\_\_\_ order her projects before working on the titles of the folders.

Her mom helped her organize everything, but she had \_\_\_\_\_ placed some of her projects

and she could not find them. Mom showed her how to arrange the folders in alphabetical order.

Now Julia was able to find her projects easi \_\_\_\_\_ and submit everything on time.

She was very thank \_\_\_\_\_ to mom.
