EARTH'S ATMOSPHERE

1.) Which layer of Earth's atmosphere is the one farthest from the surface of the Earth?

- A. troposphere
- B. stratosphere
- C. thermosphere
- D. exosphere

2.) In which layer of the atmosphere can you find meteors?

- A. troposphere
- B. stratosphere
- C. exosphere
- D. mesosphere

3.) What can be found in the thermosphere?

- A. a wide range of temperatures
- B. the Aurords
- C. space shuttles orbiting at the outer edge
- D. all of the above

4.) In the stratosphere, which important feature blocks harmful rays from the Sun?

- A. the Aurora Borealis
- B. the ozone layer
- C. the sunray shield
- D. all of the above

5.) Which gas makes up most of the troposphere?

- A. oxygen
- B. helium
- C. nitrogen
- D. hydrogen
